Services offered are as follows:

BASIC ACCESS: This service applies to any calls made from your telephone number to any of the Basic Access Areas on the map. (See legend.)

REVERSE ACCESS (BASIC): Allow friends and family within the Basic Access Areas on the map to call back to your telephone number at no charge to them.

EXPANDED ACCESS: This service applies to any calls made from your telephone number to any of the Expanded Access Areas on the map. (See legend.)

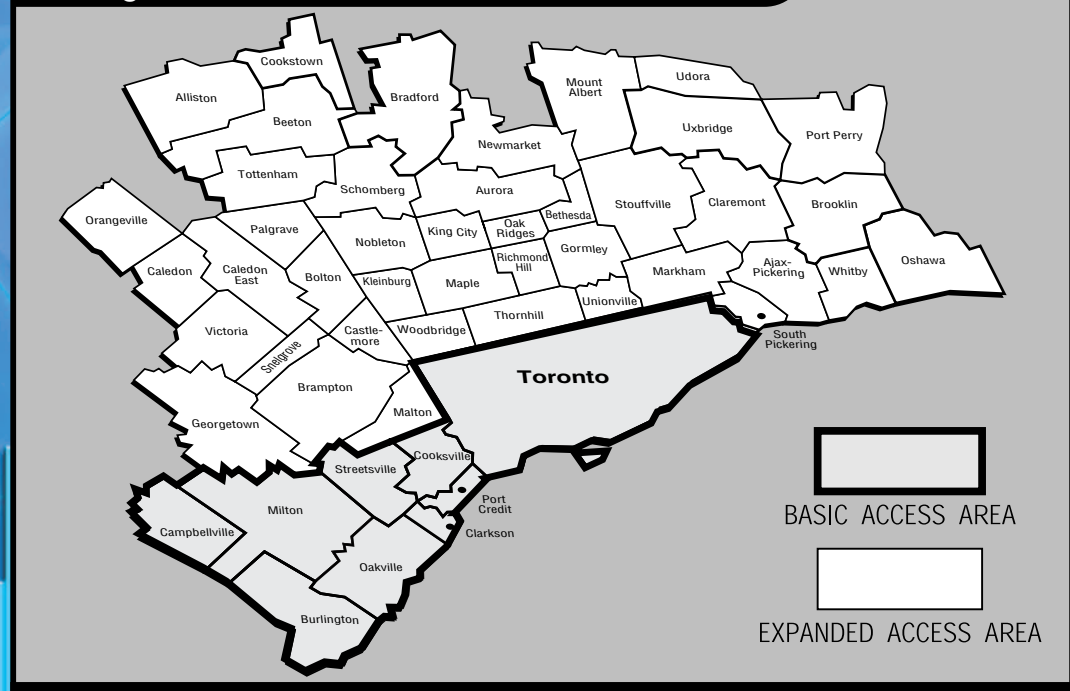

REVERSE ACCESS (EXPANDED): Allow friends and family within the Expanded Access Areas on the map to call back to your telephone number at no charge to them.

HOW TO USE OUR SYSTEM:

Simply dial your access number from a touch-tone phone-- you will hear one ring followed by an immediate tone. When you hear this tone, dial the area code + the number you wish to reach within your Metro Access Area without dialling "1" or "0" before the area code.

Calls that are made properly through our network will not appear on your long distance bill. If "1" or "0" is dialled ahead of the destination number, you may be billed by your long distance phone company.

There is nothing to equal unlimited flat rate calling for saving you money. The problem is people are confused by the vast array of plans available. Most of these plans have hidden charges, activation fees, or extra monthly fees.

CALL US

We'll give you the information you need to decide which of our plans suits your calling patterns.

CALL US

If you have a Home Office we can reduce your long distance charges with flat rate calling and Reverse Access which provides no charge calling to your associates or customers.
